Affan Fauzan

SOFTWARE ENGINEER

+62 082318236730 | affanfanzan@gmail.com

About Me

I am a student who has high enthusiasm in the field of technology development, especially in the role of a Software Engineer. Both in the frontend and backend fields, I have a deep focus on languages and several frameworks such as Javascript, Node.js, Express, and React.js. I am also active in the Devaccto organization, where I gained a lot of knowledge and experience in the IT field. With strong determination, I aspire to become a programmer who can provide benefits to many people.

Organization

Participant – Devaccto RPL   **2024 – Present**

- **Skills development:** Actively participate in workshops and group discussions

  Discusses the latest technologies, including Javascript, Node.js, Express, and React,js.
- **Collaborative Projects:** Engage in team projects that emphasize collaboration in frontend and backend development.
- **Increased understanding:** Attended training sessions focused on software development, which strengthened me in various aspects of programming.
- **Knowledge sharing:** Contribute to sharing knowledge and experiences with other members, while learning from them.
